

SafeStraw™ - A Volume Limiting Drinking Aid

Bionix® SafeStraw allows healthcare providers to safely manage swallowed liquid volume and help reduce aspiration occurrence in patients with oral motor dysfunction.

PROBLEM

Patients with oral motor dysfunction have difficulty controlling a liquid bolus and often swallow prematurely causing them to aspirate.

SOLUTION

SafeStraw limits volume to approximately a teaspoon, or 6.2 ml's, per sip helping to reduce the likelihood of aspiration by promoting a controllable liquid bolus.

RESULTS

Limited bolus size helps reduce aspiration risks allowing patients to safely, discreetly, and independently drink from a variety of containers such as cups and bottles.

PRODUCT OFFERING

- #1500** - Box of 12 White, Thin Liquid SafeStraws
- #1510** - Box of 12 Blue, Thick Liquid SafeStraws
- #1520** - Variety Pack (6 White and 6 Blue SafeStraws)

“By limiting volume per suck, it has also prevented aspiration in my patients who have decreased oral motor control following a stroke. It makes my patients feel safe and dignified, as they are able to discreetly use the device in restaurants after leaving the hospital.” - Jennifer Hanners, SLP

Refer to the package insert supplied with product for specific information on indications for use, contraindications, warnings, and precautions.

POTENTIAL REIMBURSEMENT (U.S. ONLY)

CPT Code/Description

92526 - For potential reimbursement for treatment of a swallowing dysfunction and/or oral function for feeding.

SINGLE PATIENT
MULTIPLE USE

Rx ONLY

MADE IN
THE U.S.A.

WARNING:
CHOKING HAZARD.
Contains small parts.
