

# Lighted Placement Tool

Bionix® Placement Tool combines illumination, magnification, and 5 depth guides to help Audiologists take less time to safely and accurately place a foam block deep in the ear.

## PROBLEM

Placing a foam block deep in the ear canal is difficult without proper visualization.

## SOLUTION

The Lighted Placement Tool combines the award winning technology of the Lighted Ear Curette™ with Magnification with a unique, bayonet design for an enhanced site line.

## RESULTS

An elegantly slim, brilliantly lit and simply magnified device to promote proper visualization of the ear canal for more accurate foam block placement.
