CT Rated PICC

The perfect balance of strength and flexibility.

medcompnet.com/pro-picc

Innovative technology from Medcomp[®], has allowed for the combination of CT Power Injection capability and infusion therapy. The combination of both technologies in the Pro-PICC[®]CT reduces patient trauma and risk associated with secondary venous access, improving patient comfort and clinical outcomes, while reducing overall costs to you and your facility. Through Medcomp[®]'s continued advancement of vascular access products, you and your patients now have a powerful platform for infusion therapy.

- Approved for both Infusion Therapy and CECT injections.
- Design allows for CT Injections for diagnostic imaging.

REDUCED TAPER
Our 3F PICC combines the smallest proximal diameter and shortest taper length without compromising power injection rates.

WHITE DEPTH MARKINGS
provide easy identification of catheter length.

PRINTED IDENTIFICATION
and **PURPLE COLOR** clearly denote maximum flow rates for contrast injection.

EASY GRIP™ crack resistant luers combine comfort and strength.

INDUSTRY'S FINEST COMPONENTS

21 Gauge Introducer Needle with Echogenic Tip

- "Super Sharp Needle" provides a less traumatic insertion
- Industry's needle of choice
- Greater visibility

Nitinol Guidewires

- Radiopaque tips for greater radiopacity
- Multiple wire lengths

Tearaway Sheath

- Unique "Wide Mouth" opening for easy device insertion
- Lubricious teflon material combined with unsurpassed dilator to sheath transition for easy insertion
- Ergonomically designed sheath handles for easy peel-away
