

SSCOR DuCanto Catheter

“A simple and effective tool to support routine and emergency airway management.”

- James C. DuCanto, M.D.

- Larger internal diameter
- Designed to fit the Oropharyngeal Anatomy
- Can be used in the SALAD technique

The **SSCOR DuCanto Catheter™** is a single-use, non-sterile, rigid suction catheter specifically designed to be used by emergency care providers to aspirate liquids or semi-solids from a patient's upper airway.

It has a **larger inside diameter** than a standard Yankauer suction tip to facilitate the removal of fluids as well as solid material. The larger suction lumen makes it significantly less likely to clog in an emergency situation.

The **hyper curved catheter** is shaped more like a patient's airway making it easy to position the catheter and work with other complementary devices used to clear a patient's airway.

Clearing The Airway Is Our #1 Priority

SSCOR.com

The **SSCOR DuCanto Catheter™** is constructed of a rigid PVC material. The larger internal diameter allows for larger pieces of emesis to pass while the lack of thumb port makes suction immediately available when the catheter is connected to the suction source. By removing the vacuum control, the caregiver does not need to locate and keep their thumb correctly positioned over the thumb port to clear a patient's airway.

Instrumental in the NEW SALAD Technique.

The SALAD (Suction Assisted Laryngoscopy and Airway Decontamination) technique calls for constant suction provided by a catheter in the upper airway, continuously removing vomit, blood and other materials, around which the practitioner intubates the patient via either direct or video laryngoscopy.

Catheter

Clearing The Airway Is Our #1 Priority

SSCOR DuCanto Reference/Part Number: 200-00002

Specifications:

Shaft diameter: .26" x .55" (6.6mm x 13.9mm)

Shaft length: 9.3" (236.22mm)

For best results, use SSCOR #43200 OR #43203 patient connecting tubing. Both have a large internal diameter similar to the SSCOR DuCanto Catheter.

#43200 - 6 Feet

#43203 - 3 Feet

Dr. James C. DuCanto is an anesthesiologist with 20 years' experience in private practice who possesses substantial experience in the clinical practice and teaching of difficult airway management, as well as the use of patient care simulators.

Dr. DuCanto works at the Aurora St. Luke's Medical Center in Milwaukee, Wisconsin where he serves as a staff anesthesiologist, Director of the Simulation Center, and director of the Anesthesiology rotation for students and residents.
